Concentrated technology
at a moderate price

Welcome to a new evolutionary range of paramotors
with 3D swing arms and comfort tubes
This model includes all the latest technology regarding piloting and comfort.

The Primus, the Pluma’s ‘little brother’

Most of the peripheral parts (carbon foot, tank, cage and harnesses) are compatible with both models.

An upgrade is possible from the Primus to the Pluma

For only € 1’833* you can convert your Primus and thus benefit from all the Pluma technology.

• Price
A full range for every pilot from € 4’160 to € 4’990*

• Ergonomic
2 kg lighter than our previous model with mobile swing arms and with a centre of gravity reminiscent of the Pluma much closer to the pilot, making it more comfortable on the ground.

*VAT not included
• Harness with comfort tubes
The comfort tubes eliminate vibrations and guarantee an optimal propeller alignment and cohesion between the harness and the chassis.

• 3D system, comfort or racing mode
The mobile swing arms with the 3D system are now offered as standard throughout the new Adventure range. This system allows the pilot to fly in a locked position (recommended for novice pilots and for comfort) or unlocked (for experienced pilots, giving more feedback and feeling).
MATERIALS AND CHASSIS

The foot of the chassis and all the propellers are in carbon as standard.

The main chassis (in steel) and the stainless-steel swing arms are made entirely in our factory in Coignières.

The versatile geometry of the chassis is designed to match the most popular engines on the market.
Unique cage size for propellers diameters 115 and 130 cm (45,3 and 51,2 inch).

With five profiled arcs and four strong, lightweight carbon radials, assembly is fast and easy, with the net being tensioned in a single movement.

Compact, lightweight tank with a capacity of 11 litres (2,9 US gal), allowing to fly and take off with 1 litre (0,3 US gal) of fuel only.

The filling is easy and it can also be easily disassembled for storage and handling.
**HUIT.1 80CC . . . . . . . . . . . . . . . . . . . BY H&E**

Compact and very quiet engine, it is the evolution of 8.0 version. Its installation on the chassis has been optimized for a greater compactness. Suitable for any pilot up to 80 kg (180 lbs).

**TIGER 160CC . . . . . . . . . . . . . . . . . . . BY SIMONINI**

A versatile engine for beginners and experienced pilots. The choice of the champions (P. Vallée World Champion in 2012 and T. Petit in 2016). 22 HP at 7000 r.p.m. for a pilot up to 95 kg (215 lbs).

**EOLE 135CC . . . . . . . . . . . . . . . . . . . BY BIDALOT**

Easy-to-use and extremely quiet engine. With its 25 HP, its thrust and its great responsiveness, it will gratify the pilots up to 110 kg (240 lbs) as well as the lighter pilots looking for power.

---

$1,0\,\text{kg} = 2,2\,\text{lbs}$

**PRIMUS OPTIONS**

- **BUMPER extra protection**
  Accessory for beginners’ pilots

- **COMFORT HARNESS**
  Cordura fabric and “air comfort” system (+ 600 g)

- **HAND THROTTLE “CAMELEON”**
  For more handling

- **MAYDAY PARACHUTE & CONTAINER**
  A complete range

- **AIR BAG**
  For more safety

- **FULL CARBON CAGE**
  Dynamic and audacious look, solidity with lightness
